Tyler Clair November 2017 SEA Employee of the Month

11/01/2017

Tyler Clair was honored as the SEA November 2017 Employee of the Month

Tyler Clair serves as a Systems Administrator for Academic & Instructional Services on the Logan Campus. He was honored in January as the November 2017 SEA Employee of the Month and is now in the running for the SEA Employee of the Year. During his presentation in the AIS office, he was commended for his excellent work on behalf of the team and the campus community.

In an excerpt from his nomination letter, you can see why he is so deserving of this recognition: "During the week leading up to the start of each semester, and the first week of school, Tyler spends day and night monitoring the Banner and Canvas data flow to make sure students will have access to their Canvas courses on the first day of school... During August, others on his team were working on an in-house project that would allow a visually impaired instructor to control the classroom technology with their voice. When the project hit a technical challenge, it was Tyler who spent his weekend learning the system, and he worked for two weeks to get the project working just in time for the start of classes this fall."

Congratulations Tyler!
